

Symonite FR Ultra

Features	Benefits
Deemed Non-Combustible	<ul style="list-style-type: none"> • Deemed to Satisfy (DtS) • BCA/C1.12 • Can be used anywhere a non-combustible panel is required
Australian Made and Owned	<ul style="list-style-type: none"> • A Trusted brand for over 30 years • Local knowledge • Supporting local industry
Solid Core	<ul style="list-style-type: none"> • Flat surface • No telegraphic core effect compared to honeycomb core • Supreme impact resistance compared to PE and honeycomb cores • Superior wind load performance • No “oil canning” effect as metal or solid aluminium
Available in any colour from our colour collection	<ul style="list-style-type: none"> • Choose from our new and freshly updated colour collection • Four matching Colorbond © colours – refer website
Pvdf paint coating technology	<ul style="list-style-type: none"> • The most advanced paint surface used globally • Flat painted surface • No motley look as powder coating.
Able to be “true anodised”	<ul style="list-style-type: none"> • The only aluminium composite panels that can be “true anodised” within Australia to your specific requirements.
Available in “good two side”	<ul style="list-style-type: none"> • Ideal for glazing applications • Ideal for screening applications • Cost effective compared to painting
Silicone bond directly to the core edge	<ul style="list-style-type: none"> • No need to roll edges. • Potential cost savings on installation and fabrication.
Fabricate using traditional techniques	<ul style="list-style-type: none"> • With a little adjustment you can use the techniques you currently use to fabricate panels. • On and off-site fabrication
Suitable to use with the Smartfix fixing system	<ul style="list-style-type: none"> • Smartfix is a third party Australian made architectural fixing system that does not require silicone jointing, providing clean maintenance free aesthetics.

Serious about Safety

Symonite is a responsible supplier of Aluminium Composite Panels and we are **serious about safety**. Our panels are exclusively manufactured in Australia using the highest quality raw materials and we are continually engaging with authorities in an effort to maintain compliance. Fire certificates provided for specific products must be considered as an overall fire solution in consultation with qualified professionals.

For further information please contact Symonite.
